

AG 300

Floor grilles

Product	AG 300	AGS 300
Construction material	Aluminium	Aluminium
Finishing	Natural anodized	Natural anodized

AG and AGS 300 floor supply/exhaust grilles especially in computer rooms and telephone centers. These grilles are fitted with a series of fixed horizontal vanes, out of anodized natural aluminium, which are mechanically assembled. These grilles are very sturdy to bear the weight of people walking over them. According to the size the acceptable load goes from 200 to 600 kg.

They come in two versions:

- AG 300: with outer frame.
Removable core fixed by springs to the floor frame, front straight vanes.
- AG 320 like AG 300 except that the front vanes are 15° bent.
- AGS 300, without frame, only with vanes.

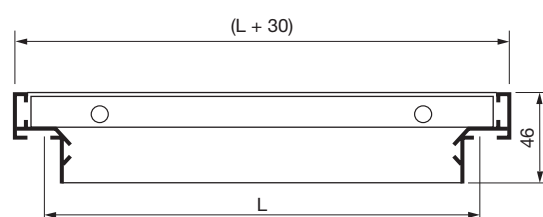

Applications AG, AGS 300 floor exhaust/supply grilles are used in computer centers, telephone centers, rooms with a lot of electronic equipment, laboratories, etc. Standard thickness 30 mm, other dimensions on request.
