

## SG

### Air-tight inspection doors

Product	SG
Construction material	Steel
Finishing	Electrolytic galvanized

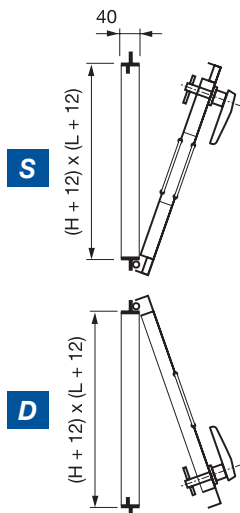

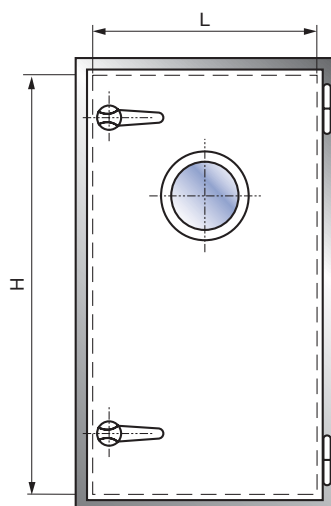

SG air-tight inspection doors and SGW air and water-tight inspection doors are in galvanized steel sheet and are fitted with a T-shaped frame and hangers for wall installation. SG doors are provided with metal handles for right (R) or left (S) opening. They also have a gasket along side the entire frame for tightness. SGW doors are closed by cross rods and locking wheels. There are two different models for SG and SGW air-tight doors:

- Single leaf
- Double leaf

The double leaf type includes soundproof and thermal insulated panels which assure good thermal insulation and acoustic attenuation.

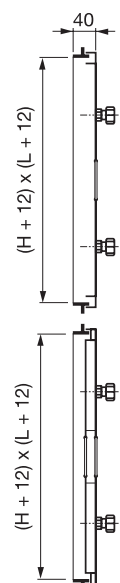

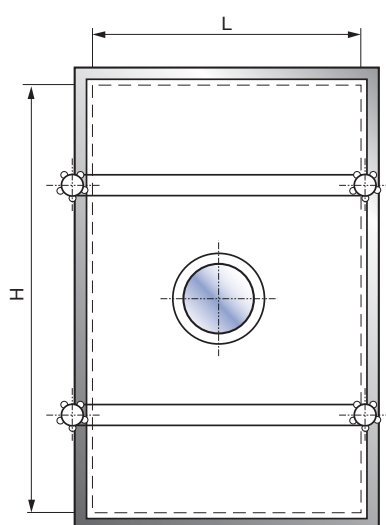

**Applications** SG air-tight doors are used in air systems to access ventilation rooms, air treatment units, air cleaning units, filter sections, etc.

## Size

Sizes (mm)		SG 20 D/S single leaf	SG 21 D/S double insulated leaf
L	H	€	€
