Front loading frames for filters

Product	CTA
Productions	PVC corner pieces – aluminum profiles
Locking system	With clamps
Fixing bolts	Special type with flush head
Gasket	Closed cells neoprene

Modular front loading frames CTA series 10-15-20 are designed to house:

- Flat and corrugated pre-filters
 - Filtra-Pak soft pocket filters
 - Filtra-Pak rigid pocket filters RP
 - Sigma high efficiency filters (flanged version)
- Furthermore to produce filtering walls in turbulent duct flows and air treatment units.

Installation The installation of CTA frames and the installation/replacement of filters is easy and quick to do without any special tools.

Advantages

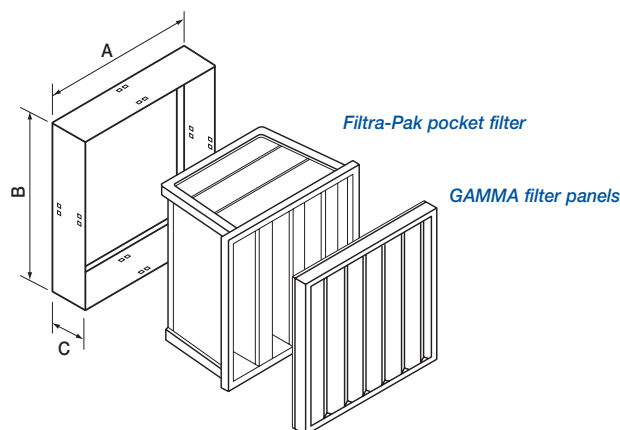

- Modularity
- Sturdiness
- Flexible use
- Installation in multi-stage sections
- Easy to install

Max. operating conditions When the filter bank exceeds in height the three units of the module and in width the four units of the module, it is necessary to create a supporting structure, because the weight of the filters and the maximum operating pressure require sturdy structures.

Code	Sizes (mm)			Weight	Filter sizes (mm)
